

Measured adaptation: Qwen2.5-Coder-14B-Instruct · one RTX Pro 6000
Session time sums LLM request latencies; tool durations are excluded.
3 repeats per policy; whiskers show observed repeat ranges (not confidence intervals).

Prefix-aware aging disabled; CacheWise uses tool-name predictions.
InferCept uses preserve/discard without swap. CacheWise* oracle was not measured.
Measured loads only: 10. Layout adapted from CacheWise (figure13).
